## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to an insole with an arch support, classified in class 36, subclass 145.
  - II. Claims 18-20 and 27-32, drawn to an insole with inserts in heel and forefoot with an arch support, classified in class 36, subclass 174.
  - III. Claims 21-26, drawn to an insole with an arch support and at least one shock absorber, classified in class 36, subclass 153.
  - IV. Claims 33-40, drawn to a layered sole with an insole, arch support and shock absorbers, classified in class 36, subclass 44.
  - V. Claim 41, drawn to the method of making a three-dimensional foot device, classified in class 12, subclass 142N.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as being used to support the arch of the user; Invention II has separate utility such as an insole with supports for the heel and forefoot of the user; Invention III has separate utility such as a shock absorber for the user's entire foot; and Invention IV has separate utility such as supporting the user's arch while absorbing shock throughout the rest of the foot. See MPEP § 806.05(d).
3. Inventions V and the other invention are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation,

Art Unit: 3728

different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are an insole and the method of making a three-dimensional foot support.

4. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, the search required for one Group is not required for any other Group, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Charles Cotropia on November 1, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Telephone inquiries regarding the status of applications or other general questions, by persons entitled to the information, "should be directed to the group clerical personnel and not to the examiners. In as much as the official records and applications are located in the clerical section of the examining groups, the clerical personnel can readily provide status information without contacting the examiners", M.P.E.P. 203.08. The Group clerical receptionist number is (703) 308-1148.

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers or other general questions should be directed to Tech Center 3700 Customer Service at (703) 306-5648, email [CustomerService3700@uspto.gov](mailto:CustomerService3700@uspto.gov).
